Multiplicities of second cell tilting modules	1
Torsten Ertbjerg Rasmussen	
A new construction for free inverse semigroups	20
Olga Poliakova and Boris M. Schein	
Identities with a single skew derivation	59
Chen-Lian Chuang and Tsiu-Kwen Lee	
Algebraic geometry over groups III: Elements of model theory	78
Alexei Kvaschuk, Alexei Myasnikov, and Vladimir Remeslennikov	
On Bol loops of exponent 2	99
Michael Aschbacher	
Cohen–Macaulay modules, (co)torsion pairs and virtually Gorenstein algebras	137
Apostolos Beligiannis	
Duality theorems for crossed products over rings	212
Jawad Y. Abuhlail	
Double cyclotomic symmetric groups	241
Hebing Rui and Xin Wang	

Number 2, June 15, 2005

Going from cohomology to Hochschild cohomology	263
Emil Sköldberg	
On the secant varieties to the tangent developable of a Veronese variety	279
E. Ballico	
On tensor induction for representations of finite groups	287
Emanuele Pacifici	
Quasi-hom-Lie algebras, central extensions and 2-cocycle-like identities	321
Daniel Larsson and Sergei D. Silvestrov	
Topological classification of conformal actions on elliptic–hyperelliptic Riemann surfaces	345
Ewa Tyszkowska	
Krull relations in Hopf Galois extensions: Lifting and twisting	364
S. Montgomery and H.-J. Schneider	
On the degrees of complex p-solvable linear groups	384
Benjamin Newton	
On the genus of generalized Laguerre polynomials	392
Siman Wong	
On a theorem of Tignol for defectless extensions and its converse	400
Amrit Pal Singh and Sudesh K. Khanduja	

The exterior and symmetric square of the reflection representation of $A_n(q)$ and $D_n(q)$	409
Anthony C. Kable and Nilabh Sanat	
p-adic period map for the moduli space of deformations of a formal group	445
Oleg Demchenko and Alexander Gurevich	
Fixed subrings of Noetherian graded regular rings	463
Ellen Kirkman and James Kuzmanovich	
Les degrés des variétés des matrices nilpotentes	485
P.A. Fonseca Machado and I. Vainsencher	
[3 : 2]-pairs of symmetric group algebras and their intermediate defect 4 blocks	505
Stuart Martin and Kai Meng Tan	
Homogeneous splitting sets of a graded integral domain	527
David F. Anderson and Gyu Whan Chang	
L. Szpiro's conjecture on Gorenstein algebras in codimension 2	545
Christian Böhning	
Products of finite abelian groups as profinite groups	556
Krzysztof Krupiński
